0851-2121-8105 | Karawang, Jawa Barat, Indonesia

A results-driven Software Developer with proven experience in the end-to-end development of enterprise-grade applications. Successfully architected and built a secure, full-stack warehouse management system using Next.js, Prisma ORM, and MySQL, which significantly improved operational efficiency and financial accuracy. Certified in React, Android, and Flutter development, with a strong command of Clean Architecture, Role-Based Access Control (RBAC), and CI/CD principles.

## EXPERIENCES

### PT Pupuk Kujang Karawang, Indonesia

*Full Stack Developer (Internship)* Jan 2025 - Present

- **Managed the end-to-end development of V-Ton**, an enterprise-grade warehouse management system for tonnage-based billing that streamlines operations for both vendors and staff.
- **Architected and developed the full stack**, implementing a security-first architecture using **Next.js, Prisma ORM, MySQL, and shadcn/ui** with a focus on Role-Based Access Control (RBAC) and vendor data isolation to protect sensitive business data.
- **Engineered core features independently**, including the automated billing period generation and a dynamic, multi-level product classification system, which significantly improved operational efficiency and financial accuracy.
- **Ensured data integrity and security** by implementing robust permission checks at the route, component, and data levels.

### Perum Peruri Karawang, Indonesia

*Vendor Management (Internship)* Apr 2023 – Sept 2023

- **Created a comprehensive Partner Selection** Working Paper to identify and evaluate potential partners for the procurement of goods and services, ensuring alignment with organizational needs.
- **Orchestrated the timely dispatch of Standard Lab** samples from the Local and Strategic Sourcing Section to the Laboratory for testing, ensuring that all product samples from partners met user specifications and compliance standards.

### Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka Remote

*Student Trainee – Mobile Development (Android) Learning Path* Feb 2021 – Jun 2021

- **Developed Android applications** from beginner to advanced levels, mastering UI design, activity lifecycle, and third-party integrations. Used Android Studio, Kotlin, API integration, and applied Clean Architecture principles to ensure scalable and maintainable code.
- **Collaborated with a team** to create an Android app that optimizes ambulance routes using Cloud Computing and Machine Learning, enhancing emergency response efficiency.

## EDUCATIONS

### Universitas Singaperbangsa Karawang 2018-2022

*Bachelor Degree in Computer Science, Informatics (3,71/4,00 GPA)*

## CERTIFICATIONS

### • Dicoding – React Web Developer Expert 2025

Gained React development expertise through Linter & clean code, State Management Redux, Automation Testing, Deployment CI/CD and React Useful Ecosystem. ID: [ERZRE7632XYV](#)

- **Dicoding – Android Developer Expert**

2024

Gained Android development expertise through Clean Architecture, Reactive Programming, DI, Modularization, CI/CD, performance, security, and a Capstone Project. ID: [EYX4V50RWZDL](#)

- **Dicoding – Flutter Developer Expert**

2024

Clean Architecture, Test-Driven Development, Advanced UI, Modularization, Reactive Programming, Continuous Integration, Performance Optimization, Security, dan Post-Development. ID: [JLX14Y2RGX72](#)

## SKILLS

---

### Hard Skills

- **Web Development:** Next.js, React.js, RESTful APIs, MySQL, Prisma ORM, Shadcn/ui.
- **Mobile Development:** Kotlin, Dart, Android SDK, Flutter.
- **Architecture & Principles:** Clean Architecture, Role-Based Access Control (RBAC), Git & Version Control, Dependency Injection, Continuous Integration/Continuous Deployment (CI/CD).
- **Testing & Tooling:** Automation Testing, Android Studio.

### Soft Skills

- Continuous Learning & Self-Improvement
- Attention to Detail
- Communication
- Problem Solving
- Adaptability
